COMPÉTENCES

Simulation and calculation

- LTspice
- MATLAB / Simulink
- Octave

Programming

- Python
- C , C++

Systems

- Raspberry Pi, Arduino

LANGUAGES

French

Native language

English

C1

Spanish

A2

INTERESTS

- **Science :** electronics, electrical systems, and mechatronics
- **Sports :** basketball (club), swimming, spearfishing
- **Hobbies :** modelisme (RC car), chess

Jules THUREL

Engineering Student - ENSEEIHT

Electrical and Electronic Engeenering · 20 years old · Driving licence (B)

PROFILE

Passionate about power electronics and autonomous systems (my intership at CERN and my personal project during preparatory classes), I offer my methodical appraoch and reliability in any field related to electronic design.

EXPERIENCE

Robotics Club of ENSEEIHT and Racing Team **2026**

- Training in C,C++, and SolidWorks

Private tutoring in mathematics and physics **2026**

Personal project (TIPE – Preparatory Classes) **2025 - 2026**

- Design of a Buck converter (20 V ► [5 V; 1 A] @ 200 kHz) with development of analog control (voltage mode).
- Full LTspice simulation of the converter, power stage, and control.
- Implementation on a breadboard and testing with a photovoltaic panel.
- Use of measurement instruments (oscilloscope, TFA) and power components (PWM, AOP, Mosfet Transistors, Driver,etc.).

Internship at CERN **2023**

- Personal initiative : one-week internship in a section specializing in the design of power converters.
- Development of a Python program to control a TFA (Transfer Function Analyser) : settings, processing, with results output in CSV.

EDUCATION

ENSEEIHT – Engineering School (Toulouse) 2026 - present

- 3EA (Electrical Energy, Electronics, Automation)
- First year of engineering training in electrical energy,electronics, and automation, with a strong focus on electrical systems, control and power electronics

Les Lazaristes – CPGE (Lyon) 2024 - 2026

- Preparatory classes for Gandes Écoles : MPSI then PSI (Physics and Engineering sciences)
- Solid foundations in mathematics, physics, and engineering sciences

International High School (Ferney-Voltaire) 2021 - 2024

- Scientific specializations with Advanced Mathematics option and European English option
- A-level: with distinction, with jury commendations.
